

WiFi / Bluetooth

The schematic diagram illustrates the WiFi / Bluetooth interface circuit. The central component is U34, AP6275PR3, which interfaces with RF2 (BWIPX-1-001E) and RF3 (BWIPX-1-001E). The circuit includes various control signals like WL_ANT0, WL_ANT1, WL_REG_ON, WL_HOST_WAKE, and WL_WAKE_HOST_H_GPIO0_C4. It also features power management components like C160 (4.7uF), C161 (4.7uF), and C162 (4.7uF), and a voltage detector U5 (TFM252012ALVA2R2MTAA). The diagram shows connections to GND, VCC_WL, and various GPIO pins.
